Github: github.com/yusufraja184 Mobile: +91-6299090236

Skills

- **Languages**: C, C++, Java, Python
- **Frameworks**: HTML, CSS, JavaScript
- **Tools/Platforms**: MySQL, Cisco Packet Tracer, Power Bi, Excel
- **Soft Skills**: Problem-Solving, Team Player, Leadership, Adaptability

Projects

Emergency-Call-Dispatcher-Using-Priority-Queues Link — Jul' 25– Aug' 25

- Developed an emergency call dispatcher system using priority queues to handle calls based on urgency.
- Implemented efficient logic to insert, update, and dispatch emergency calls in the correct priority order.
- Created a simple user interface to input caller details, emergency type, and priority
- Built the entire project using C++,Pythonleveraging its data structure capabilities for fast and reliable performance.

Deadlock-prevention-and-Recovery-Toolkit Link — Feb' 25– Mar' 25

- Built a clean, responsive, and user-friendly interface to simulate deadlock scenarios, enabling users to create, modify, and monitor processes and resources with smooth and intuitive navigation across the platform.
- Developed dynamic and modular components with efficient state management to instantly reflect changes in resource allocation, deadlock detection, and recovery actions, ensuring a consistent and interactive user experience.
- Implemented deadlock prevention, avoidance, detection, and recovery algorithms, providing real-time system state updates and improving reliability and correctness of simulations.
- Designed and integrated backend services and data handling mechanisms to manage process states, resource matrices, and execution logs, ensuring accurate analysis and stable application performance.

Training

Mastering C++: From Object Oriented Programming to Dynamic Programming Certificate — Jun – Jul' 25

- Gained strong proficiency in C++ programming, covering core concepts such as variables, control structures, functions, pointers, memory management, and the Standard Template Library (STL) through hands-on practice.
- Developed a solid foundation in Object-Oriented Programming (OOP) principles including classes, objects, inheritance, polymorphism, abstraction, and encapsulation to design modular and maintainable applications.
- Implemented and optimized algorithmic solutions using Dynamic Programming, recursion, and problem-solving techniques to improve time and space efficiency across multiple problem statements.

Certificates

- Udemy: Master Layer Farm Management The Business of Millionaires |Certificate — Oct' 23
- Social Network – NPTEL |Certificate — Apr' 25
- Computational Theory: Language Principle & Finite Automata Theory |Certificate — Aug' 25

Achievements

- **Secured 5th Rank in University Level Hackathon | Lovely Professional University** — Sep' 24
  Among 200+ participants in coding competition
- **Secured 6th Rank in University Level Code–A–Thon | Lovely Professional University** — Sep' 23
  Among 300+ participants in coding competition

Education

- **Lovely Professional University** — Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 6.74*** — *Since August' 23*
- **Senior Secondary School Bauliya** — Rohtas, Bihar
  Intermediate; ***Percentage: 60%*** — *March' 21 – March' 23*
- **Mahadeopuri High School** — Rohtas, Bihar
  Matriculation; ***Percentage: 80%*** — *January' 19 – April' 21*
